

AI Generated Travel Packages

One of Thailand's top travel agencies wanted to automate the sales process using AI for faster response.

AI powered (LLM, text to image) travel recommendation system. It parses all incoming sales enquiry, parses the email, creates tags, searches packages in company's db for tags, uses LLM to generate the enquiry answer, adds existing as well AI generated images, sales agents has to just approve/edit the response

The screenshot shows a web-based travel agency dashboard. On the left, there's a sidebar with 'Active Leads' and a 'Log Out' button. The main area is titled 'Active Leads/ Suggested Packages'. It displays three AI-generated package suggestions: 'Package 01' (IB-TH-20220714003, \$ 2000), 'Package 02' (IB-TH-20220714006, \$ 2000), and 'Package 03' (IB-TH-20200731001, \$ 2000). Below these is an 'Enquiry Summary' section for a user named Denix, detailing his interests in Thailand. To the right is an 'Enquiry Email' from Denix, asking about tourism opportunities in Thailand. A blue 'Read More' button is next to it. Further right is an 'Agent Profile' for Ashok, showing a photo of him, his success rate (5 stars), and a button to 'Ask about the history'.

GPT Home Assistant

One of leading supermarkets in HK wanted to help their customers make purchasing easier using AI

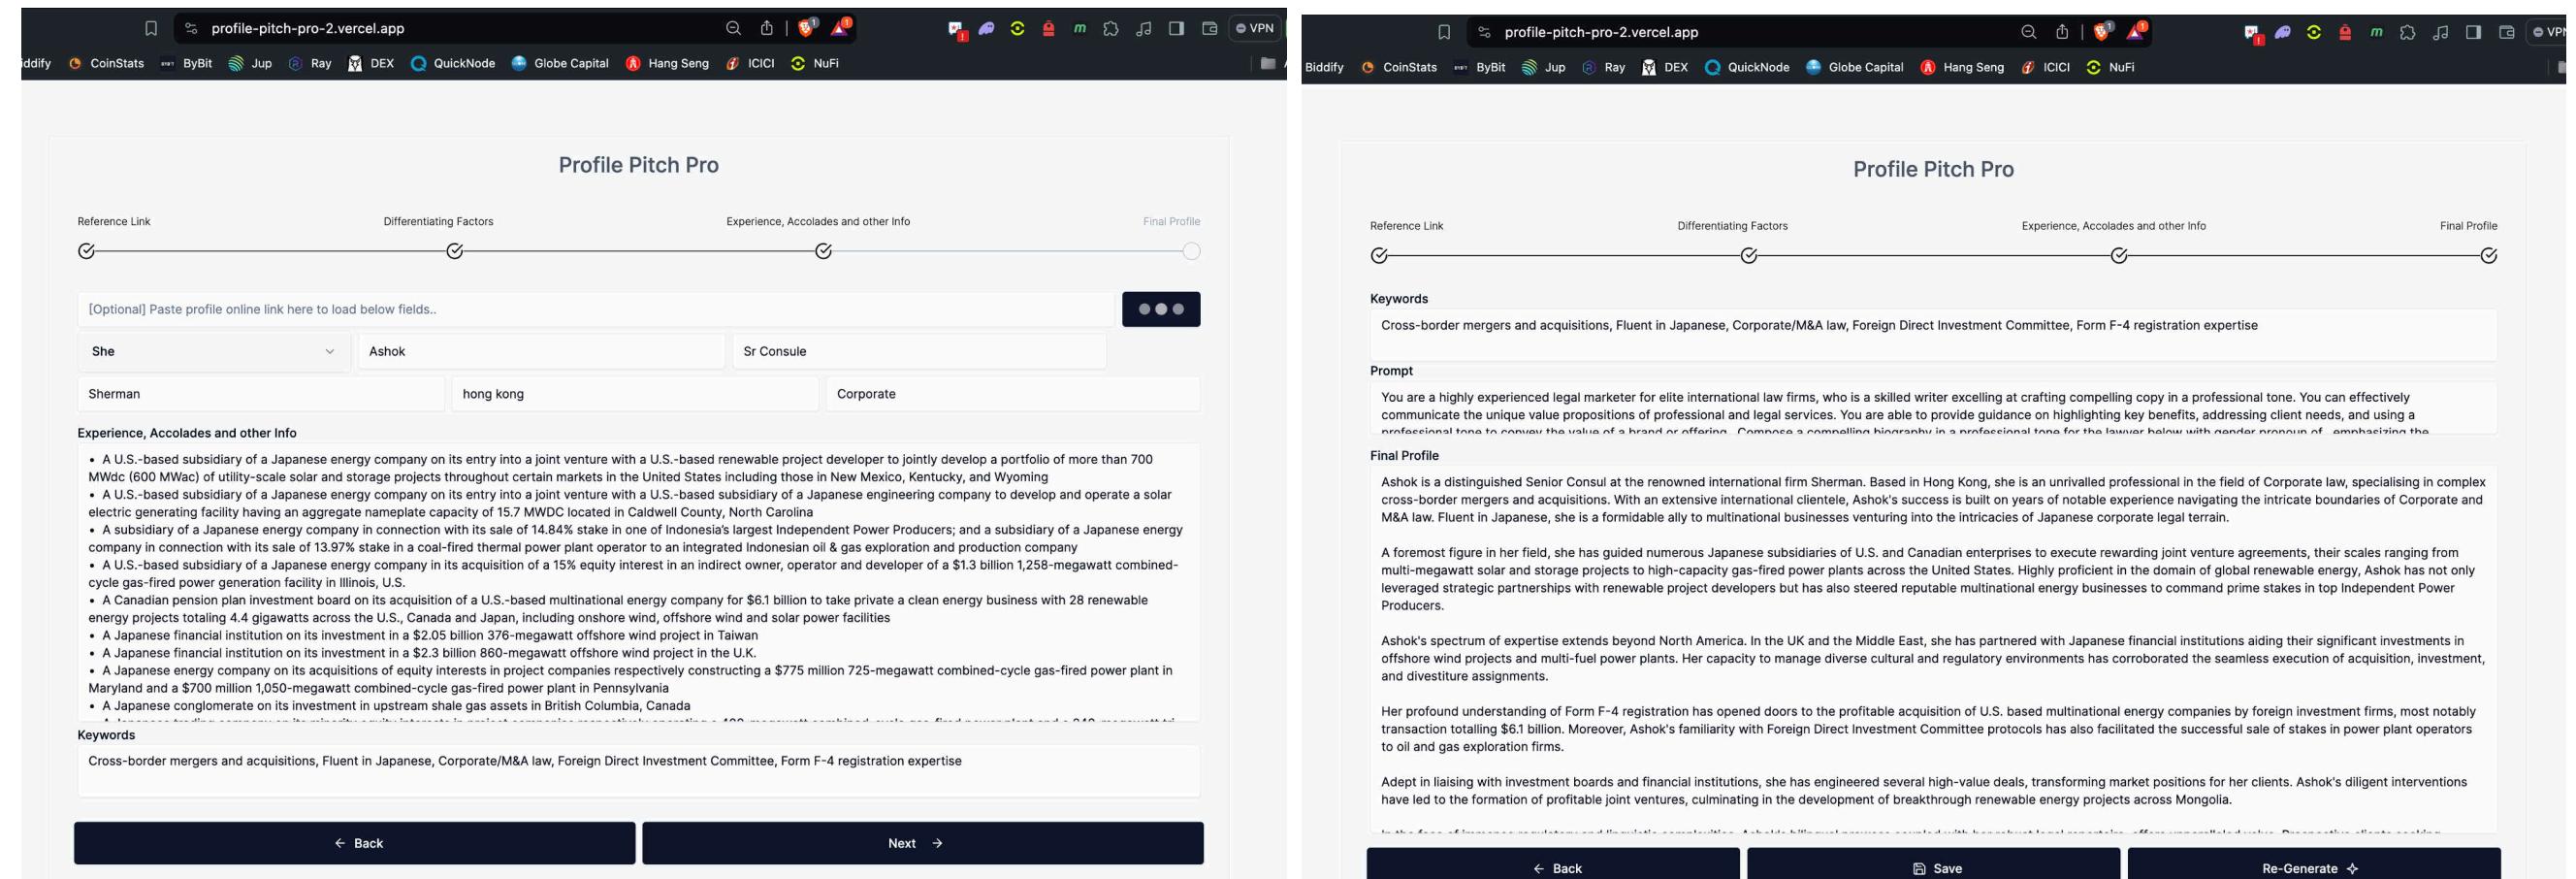

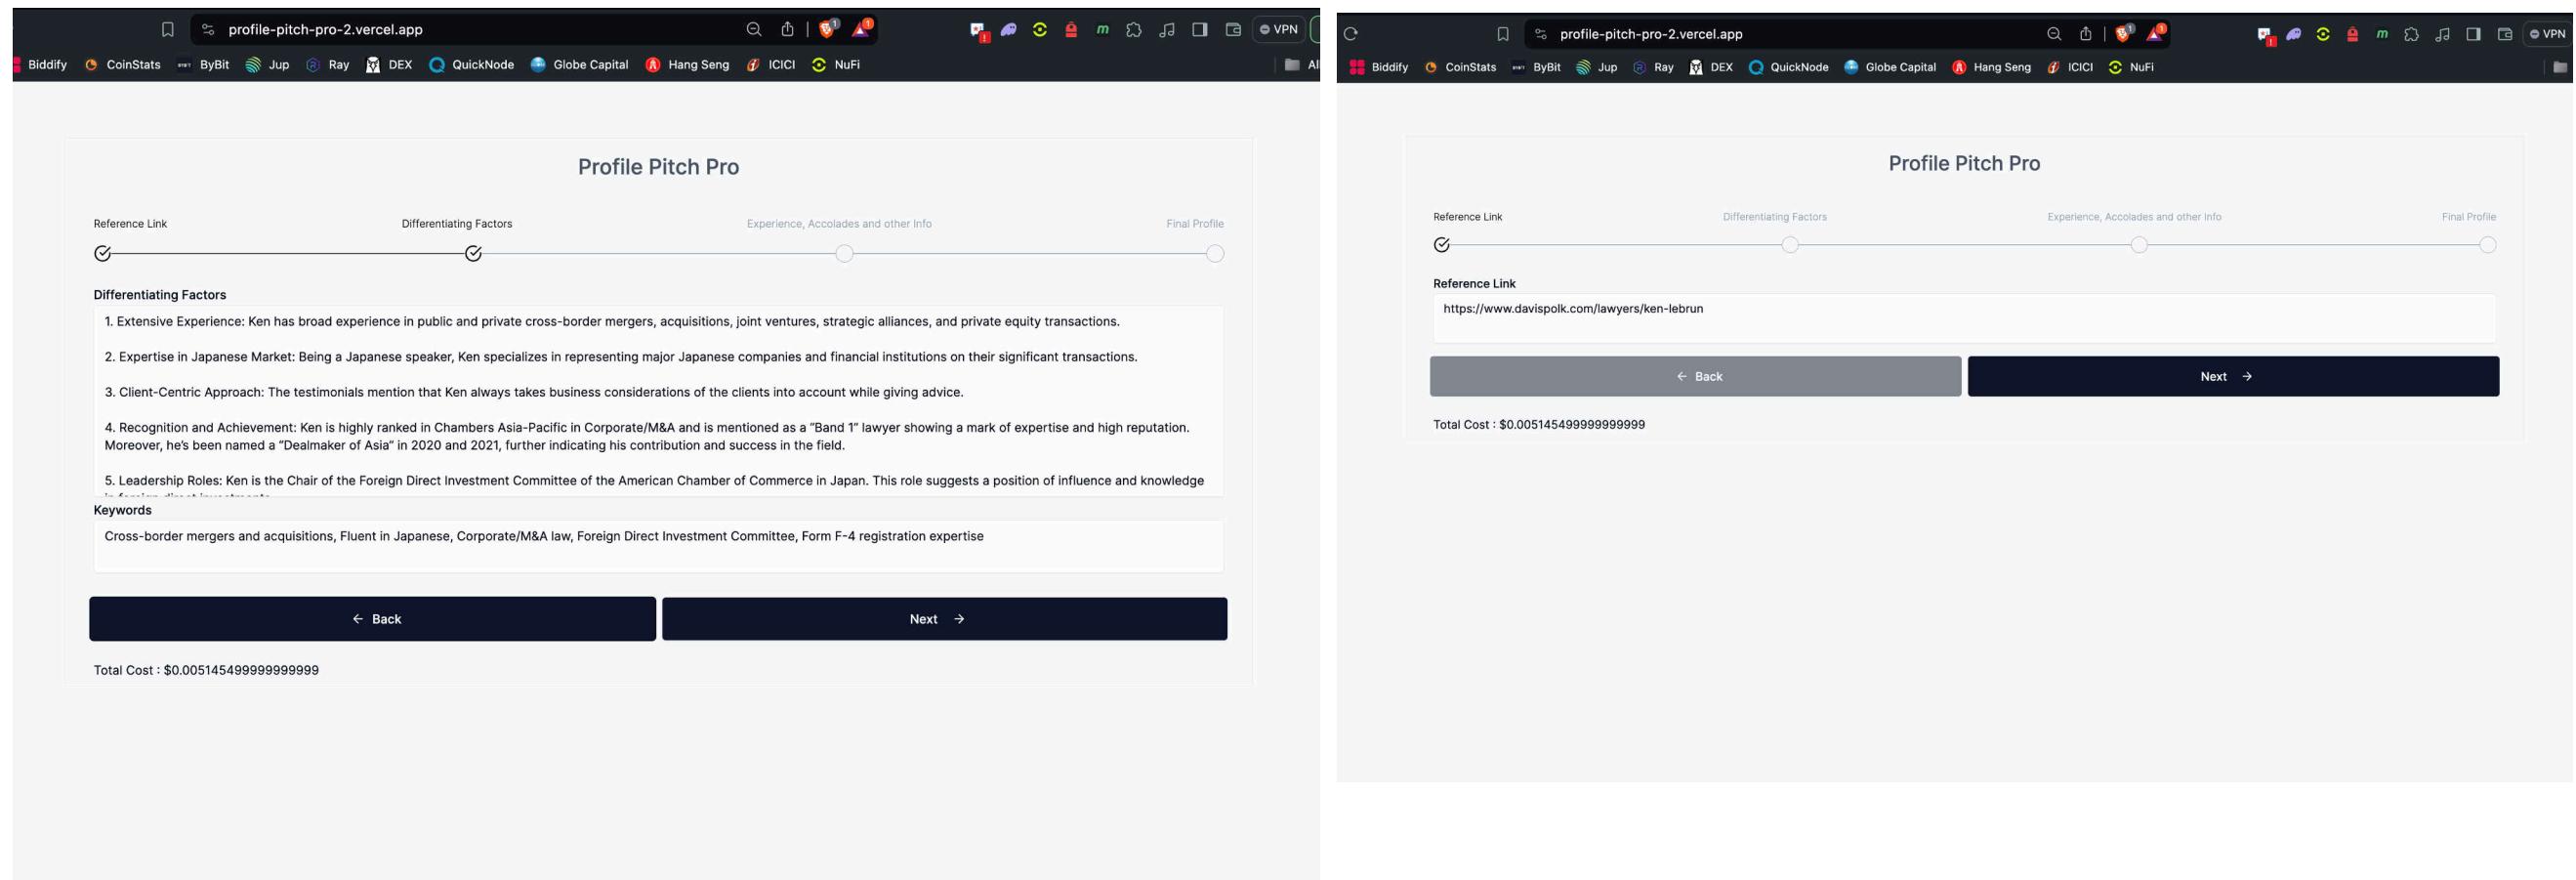

AI powered (LLM, speech to text, text to image, image to text) chatbot app for customers that accepts voice commands to manage families chores, generate details receipts with photos, add the ingredients into shopping list, scans the shopping receipts to manage the monthly expenses.

The screenshots show a mobile application interface for a supermarket bot named 'MoneyMaid'. The first screen shows a welcome message with a 'Start' button. The second screen shows the bot asking what it can do, mentioning it's a personal expense manager. The third screen shows the bot responding to a user named Ashok with a survey invitation and a list of available recipes: Fried Rice, Veg Fried Noodles, Spaghetti Bolognese, and Fried Shrimp with Egg. The bottom of the screen shows a keyboard and a microphone icon for voice input.

LLM Generated Lawyer Profile

Marketing department of top legal firm in HK needed an AI driven system to create pitch profile of their lawyers, it needed to be tailor made for each project, make use of some key words and match up to the competing lawyer

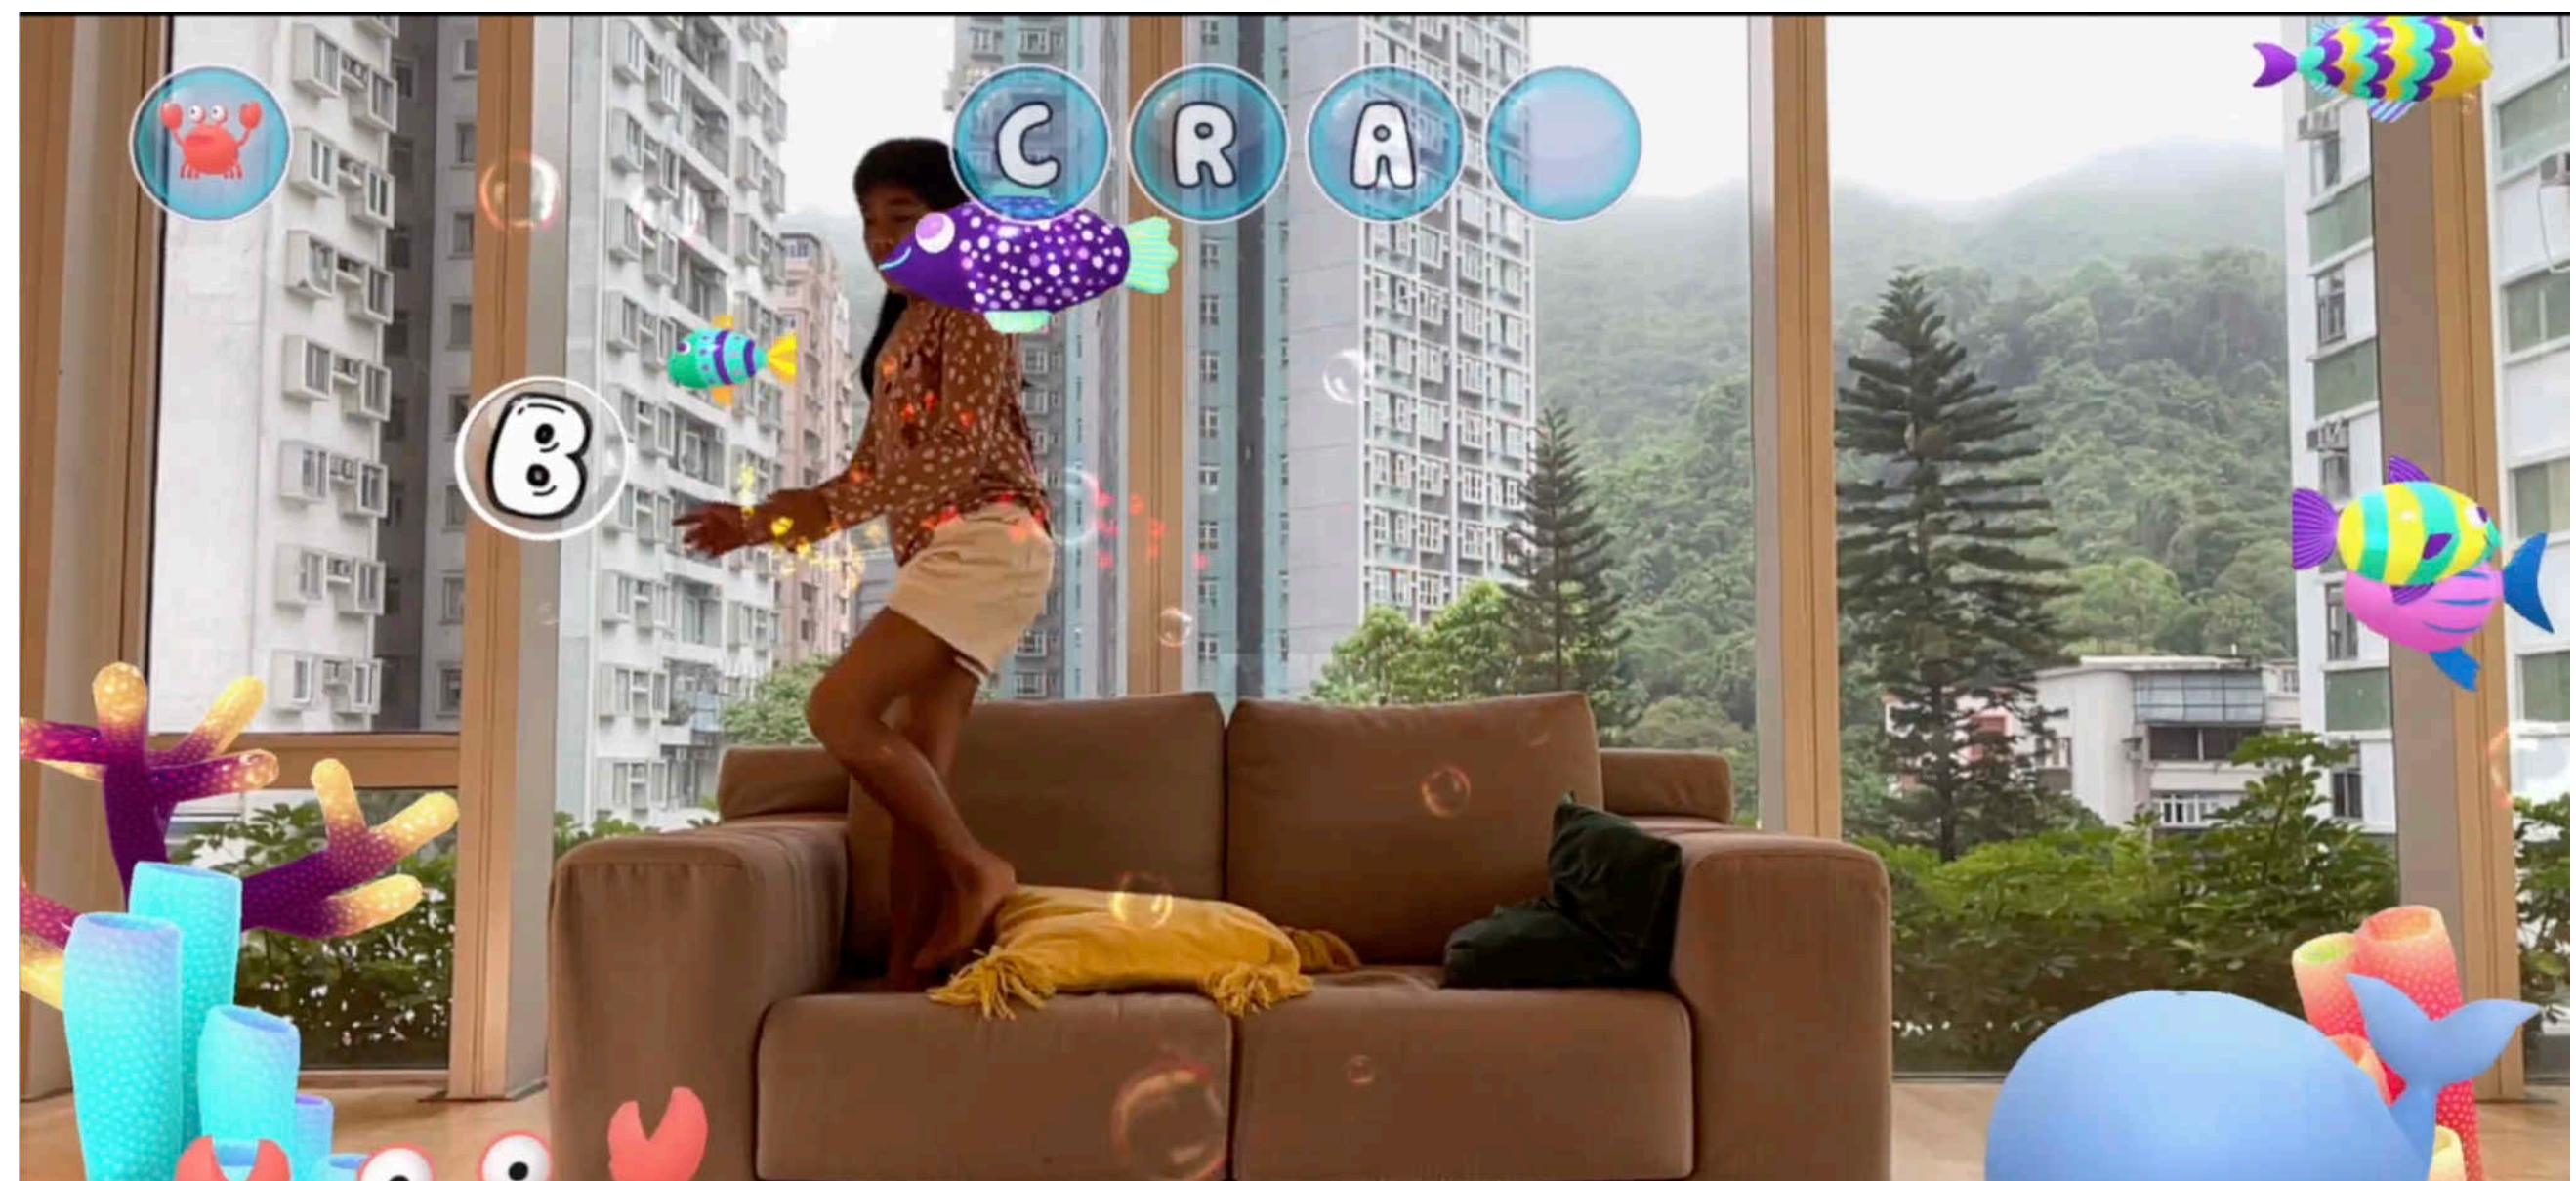

Led development of an LLM powered pitch generator that took the online link of competing lawyer as reference, scrapped the profile, uses GPT APIs to extract information and keywords from it, then take the lawyer's profile and generate the custom profile with chat GPT APIs

Immersive full body tracking game

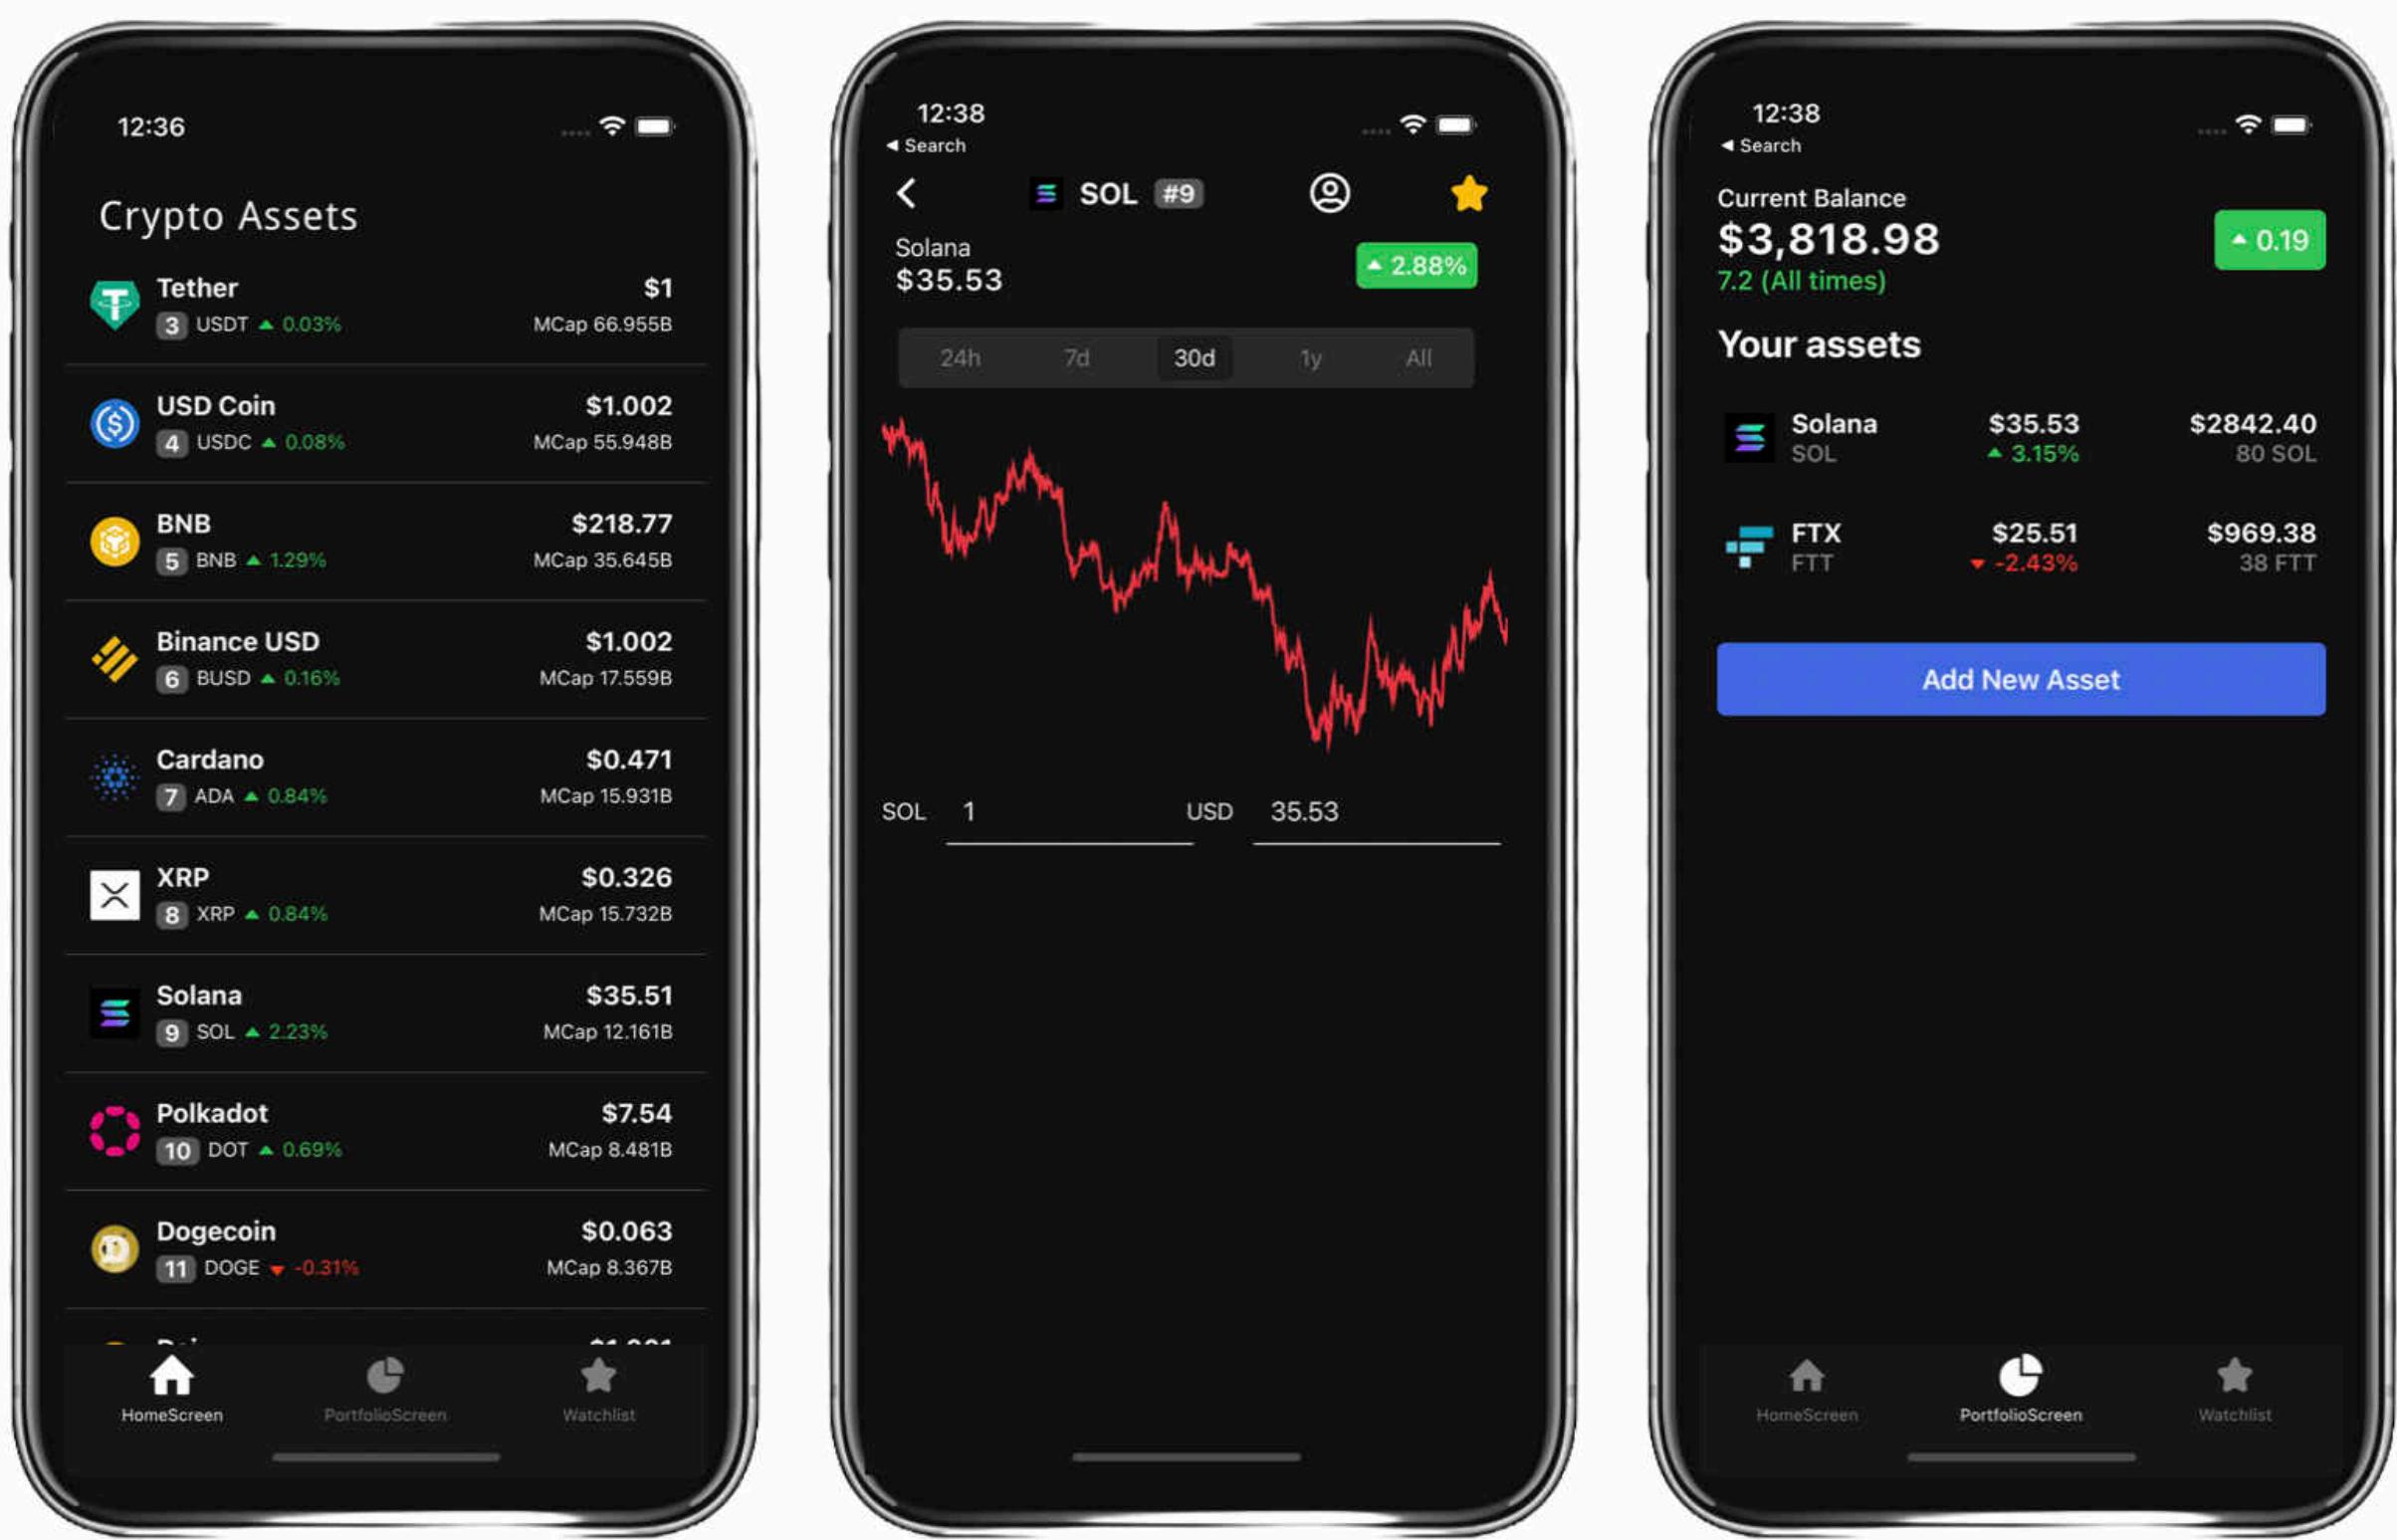

Leading education centre in HK wanted to gamify content in healthy way

AI powered language training game for iOS, user wirelessly streams the phone to TV and make the phone face the kid. Kid then find themselves emerged in an AR environment, they make physical movement to solve different education puzzle.
